

GETTING USE TO STUFF...

Well the Peanut Gang has been on the ground for ten days now. They have had lots of nourishment from Mom and tons of sleeps. They all weigh over 600 grams (roughly 1 1/2 lbs.) now. At this rate they will be pressing weights when they reach 8 weeks!

Besides sleeping, eating, etc. the pups have been stimulated by their humans and more so by Mom. Each day they spend time outside in a box lined with a towel. They started off for just 30 seconds and are now up to 5 minutes. The change in temperature is to not only accustom them to cold but also to awaken their neurological senses.

The puppy's eyes have yet to open but we expect that to start occurring over the next few days. Their vision will be blurry at first but within 7-10 days clarity should be good.

So until next week we hope you enjoy your visit with us...
